**Technology as Freedom** Mar 03 2020 Before 1930, the domestic market for electrical appliances was segmented, but New Deal policies and programs created a true mass market, reshaping the electrical and housing markets and guiding them toward mandated social goals. The New Deal identified electrical refrigeration as a key technology to reform domestic labor, raise family health, and build family assets. New Deal incentives led to nearly fifty percent of Title I National Housing Act loans being used to buy electric refrigerators in the 1930s. New Deal policies ultimately created the mass commodity culture of home-owning families that typified the conservative 1950s. [Sherman's Horsemen](#) Oct 22 2021 Approaching Atlanta in July of 1864, William Tecumseh Sherman knew he was facing the most important campaign of his career. Lacking the troops and the desire to mount a long siege of the city, Sherman was eager for a quick, decisive victory. A change of tactics was in order. He decided to call on the cavalry. Over the next seven weeks, Sherman's horsemen - under the command of Generals Rousseau, Garrard, Stoneman, McCook, and Kilpatrick - destroyed supplies and tore up miles of railroad track in an attempt to isolate the city. This book tells the story of those raids. After initial successes, the cavalrymen found themselves caught up in a series of daring and deadly engagements, including a failed attempt to push south to liberate the prisoners at the infamous prison camp at Andersonville. Through exhaustive research, David Evans has been able to recreate a vivid, captivating, and meticulously detailed image of the day-by-day life of the Union horse soldier. Based largely upon previously unpublished materials, Sherman's Horsemen provides the definitive account of this hitherto neglected aspect of the American Civil War.
