Zwarte gaten blues Jun 29 2022 Zwarte gaten zijn donker, de naam zegt het al. Als ze botsen, is daar niets van te zien. Toch komt bij een botsing van zwarte gaten een onvoorstelbaar grote hoeveelheid kracht vrij. Einstein voorspelde, precies een eeuw geleden, dat je zou moeten kunnen zien dat ruimte en tijd een beetje veranderen wanneer zo'n botsing plaatsvindt. Een 'zwaartekrachtgolf', die veroorzaakt dat tijd en ruimte niet meer constant zijn. Maar hoe observeer je zoiets? Wetenschappers zijn er tientallen jaren mee bezig geweest, en Janna Levin volgde hen op de voet: van de eerste tekeningen tot aan meetapparatuur van 40 kilometer groot, midden in de woestijn. De apparatuur werd aangezet. En vanaf dat moment was het afwachten. Zou er iets gebeuren? Had Einstein gelijk? Iedereen dacht dat het jaren zou duren voordat de eerste resultaten binnenkwamen. Maar nog geen twee weken later was er iets vreemds te zien...

After They Killed Our Father Oct 29 2019 In 1980, at the age of ten, Loung Ung escaped a devastated Cambodia and flew to the US as a refugee. She and her eldest brother, with whom she escaped, left behind their three surviving siblings, and her book is alternately heart-wrenching and heart-warming, as it follows the parallel lives of Loung and her closest sister, Chou, during the 15 years it took for them to be reunited. Their two worlds were very different, and Loung's depiction of the contrast between her life in the affluent West and that of her sister, who navigated her way through landmine-strewn fields and survived raids by the Khmer Rouge, is laced with the guilt she feels about being the lucky one. This powerful story helps us to understand what happens when a family is torn apart by politics, adversity and war. It is also the compelling and inspirational tale of a remarkable woman.
