**Feeling Good** Jul 25 2019 All human beings have spontaneous needs for happiness, self-understanding, and love. In Feeling Good: The Science of Well Being, psychiatrist Robert Cloninger describes a way to coherent living that satisfies these strong basic needs through growth in the uniquely human gift of self-awareness. The scientific findings that led Dr. Cloninger to expand his own views in a stepwise manner during 30 years of research and clinical experience are clearly presented so that readers can consider the validity of his viewpoint for themselves. The principles of well-being are based on a non-reductive scientific paradigm that integrates findings from all the biomedical and psychosocial sciences. Reliable methods are described for measuring human thought and social relationships at each step along the path of self-aware consciousness. Practical mental exercises for stimulating the growth of self-awareness are also provided. The methods are supported by data from brain imaging, genetics of personality, and longitudinal biopsychosocial studies. Feeling Good: The Science of Well-Being will be of value to anyone involved in the sciences of the mind or the treatment of mental disorders. It will also interest theologians, philosophers, social scientists, and lay readers because it provides contemporary scientific concepts and language for addressing the

perennial human questions about being, knowledge, and conduct.

**The Unauthorized Letters of Oscar Wilde** May 27 2022 HEMINGWAY FIRST NOVEL PRIZE Critical Comment: D.T. Max, New York Times Book Review: Exceptional, smart and playful, a novel of quiet seductions. An imagined correspondence between Wilde and the author that turns into a drama of cross-century friendship. Merlin Holland; author, grandson of Oscar Wilde: A charming read. Im sure Grandfather would have seen the fun of it. Hillary Hemingway; Director, Hemingway Literary Festival: What a delight to discover this unique voice. The novel is already the buzz of New York. Jill Jackson, Syndicated columnist, King Features: A brilliant correspondence, beautifully written and researched. Very funny stuff. Ellis Hanson, Author, *Decadence & Catholicism*: A style so conversational and amusing, it felt like Holloway was sitting at my dinner table. Postmodern parallels with Wilde about theatre is transmogrified into TV commercials, rentboys into go-go types in a hustler bar, Reading Gaol into a psycho-prison for sexual outcasts. They make for interesting echoes and dissonances between decadence and post-modernism, aestheticism and camp, innuendo and outness, sex as gross indecency and sex as medical problem. Giovanna Franci, Professor of English, University of Bologna, Italy: What a wonderful concept! Beautifully realized! I couldnt put it down. LINER NOTES: In February of 1993, enroute from Capetown, South Africa to Los Angeles, during a lay-over at Londons Cadogan Hotel, C. Robert Holloway is convinced he witnessed the arrest of Oscar Wilde from the very room hes occupying. After badgering a reluctant night-manager, he learns that his room is indeed the same suite from which Wilde was ignominiously hauled away to Bow Street Police Station in April of 1895. Emboldened by a split of honor-bar rose and a chocolate rush, he drafts a letter to Wilde, at once part apology - part adulation - part exorcism and no small part jet-lagged foolishness. Next morning, he deposits it in a Piccadilly post-box, and shortly departs for California, never giving it a second thought. Two weeks later a thick envelope tumbles from Holloways mail-box in West Hollywood. Filling several pages, the flamboyant hand bears a strong resemblance to Wildes. Its authors observations on Holloways lineage and threadbare education are accurate enough to unnerve him, albeit momentarily. Thus begins an audacious, outrageous, occasionally trenchant, often hilarious correspondence between a little-known TV production designer and the most famous gay man in the Western world.

**My Time** Aug 25 2019 My Time Most people live their lives on a day to day basis. Our planning calendar is booked for three to seven days in the future. We seldom take a step back and look at recent events in perspective. This book is intended to provide that perspective look at events that shaped the course of our lives. Only in retrospect do we realize the changes that have occurred and influenced events of our lives. This process might be compared to watching an "Old time silent movie". How strangely people dressed and acted in "those days". We get a sense of values and attitudes of that time. Then we see movies made during the 1930's. There is a difference in dress, in automobiles, in the telephones seen in those movies. Customs have changed and attitudes have changed since those early silent movie days. This book links day to day living with the evolving events that impact our lives, shape attitudes and philosophies, as individuals, as states and nations. It has been said, "The only thing certain is change."

**Agent and Multi-Agent Systems: Technologies and Applications** Jul 29 2022 Simulation and Decision Making, Multi-Agent Applications, Management and e-Business, Mobile Agents and Robots, and Machine Learning. In addition to the main tracks of the symposium there were the following five special sessions: Agent- Based Optimization (ABO2010), Agent-Enabled Social Computing (AESC2010), Digital Economy (DE2010), Using Intelligent Systems for Information Technology Assessment (ISITA2010) and a Doctoral Track. Accepted and presented papers highlight new trends and challenges in agent and multi-agent research. We hope these results will be of value to the research community working in the fields of artificial intelligence, collective computational intelligence, robotics, machine learning and, in particular, agent and multi-agent systems technologies and applications. We would like to express our sincere thanks to the Honorary Chairs, Romuald Cwiliewicz, President of the Gdynia Maritime University, Poland, and Lakhmi C. Jain, University of South Australia, Australia, for their support. Our special thanks go to the Local Organizing Committee chaired by Ireneusz Czarnowski, who did very solid and excellent work. Thanks are due to the Program Co-chairs, all Program and Reviewer Committee members and all the additional viewers for their valuable efforts in the review process, which helped us to guarantee the highest quality of selected papers for the conference. We cordially thank the organizers and chairs of special sessions, which essentially contributed to the success of the conference.

The Discovery of Islands Sep 06 2020 The Discovery of Islands consists of a series of linked essays in British history, written by one of the world's leading historians of political thought and published over the past three decades. Its purpose is to present British history as that of several nations interacting with - and sometimes seceding from - an imperial state. The commentary presents this history as that of an archipelago, expanding across oceans to the Antipodes. Both New Zealand history and the author's New Zealand heritage inform this vision, presenting British history as oceanic and global, complementing (and occasionally criticising) the presentation of that history as European. Professor Pocock's interpretation of British history has been hugely influential in recent years, making The Discovery of Islands a resource of immense value for historians of Britain and the world.

Chapters cover the following theorists and perspectives:  $\phi$  Alexander  $\phi$  Bourdieu  $\phi$  Ethnomethodology  $\phi$  Exchange Theory  $\phi$  Foucault  $\phi$  Giddens  $\phi$  Goffman  $\phi$  Habermas  $\phi$  Luhmann  $\phi$  Merton  $\phi$  Network and Social Capital Theory  $\phi$  Parsons  $\phi$  Rational Choice Theory  $\phi$  Schutz and Phenomenalism  $\phi$  Structuralism  $\phi$  Symbolic Interactionism An accessible and informative treatment of the central approaches in sociology over the course of the last century, this volume marks a significant contribution to sociological theory and constitutes an essential addition to library collections in the areas of the history of sociology and contemporary social theory.

Energy, the Subtle Concept Aug 30 2022 Energy is at the heart of physics and of huge importance to society and yet no book exists specifically to explain it, and in simple terms. In tracking the history of energy, this book is filled with the thrill of the chase, the mystery of smoke and mirrors, and presents a fascinating human-interest story. Moreover, following the history provides a crucial aid to understanding: this book explains the intellectual revolutions required to comprehend energy, revolutions as profound as those stemming from Relativity and Quantum Theory. Texts by Descartes, Leibniz, Bernoulli, d'Alembert, Lagrange, Hamilton, Boltzmann, Clausius, Carnot and others are made accessible, and the engines of Watt and Joule are explained. Many fascinating questions are covered, including: - Why just kinetic and potential energies - is one more fundamental than the other? - What are heat, temperature and action? - What is the Hamiltonian? - What have engines to do with physics? - Why did the steam-engine evolve only in England? - Why  $S=k \log W$  works and why temperature is  $1/T$ . Using only a minimum of mathematics, this book explains the emergence of the modern concept of energy, in all its forms: Hamilton's mechanics and how it shaped twentieth-century physics, and the meaning of kinetic energy, potential energy, temperature, action, and entropy. It is as much an explanation of fundamental physics as a history of the fascinating discoveries that lie behind our knowledge today.

Wide Area Network Design Jul 17 2021 As the cost of building and upgrading complex, large-scale networks skyrockets, carefully crafted network designs become critical- a savings of as little as 5% in your network can amount to tens of thousands of dollars per month. Wide Area Network Design: Concepts and Tools for Optimization provides the information you need to tackle the challenges of designing a network that meets your performance goals within the cost constraints of your organization. If you are considering public service alternatives such as frame relay, designing your own network with the tools provided in this book will empower you to estimate cost savings and evaluate bids from competing carriers. Intended for network designers, planners, and architects, this book enables you to estimate traffic flows and requirements in your network and explains how to use various algorithms to design a network which must meets these requirements. Features: Presents underlying design principles to help you understand emerging and future networking protocols and technologies Provides cost and traffic generators for estimating these parameters in your network Introduces the unique IncreMEntOR algorithm which can help avert disaster when the traffic flows in your network have changed
