The Netter Collection of Medical Illustrations: Integumentary System Jul 19 2021 The Integumentary System, by Bryan E. Anderson, MD, takes a concise and highly visual approach to illustrate the basic sciences and clinical pathology of the skin, hair and nails. This newly added, never-before-published volume in The Netter Collection of Medical Illustrations (formerly the CIBA "Green Books") captures current clinical perspectives on the integumentary system - from normal anatomy and histology to pathology, dermatology, and common issues in plastic surgery and wound healing. Using classic Netter illustrations and new illustrations created in the Netter tradition, as well as a great many cutting-edge histologic micrographs and diagnostic images, it provides a vivid, illuminating, and clinically indispensable view of this body system. Gain a rich, holistic clinical view of every structure by seeing classic Netter anatomic illustrations, cutting-edge histologic images and diagnostic imaging studies side by side. Visualize the most recent topics in cutaneous pathology such as sporothrix and cutaneous t-cell lymphoma as well as classic problems like alopecia and neurofibromatosis, informed by the latest developments in molecular biology and histologic imaging. See current dermatologic concepts captured in the visually

rich Netter artistic tradition via major new contributions from Netter disciple Carlos Machado, MD - making complex concepts easy to understand and remember through the precision, clarity, detail, and realism for which Netter's work has always been known. Get complete, integrated visual guidance on the skin, hair, and nails in a single source, from basic sciences and normal anatomy and function through pathologic conditions. Adeptly navigate current controversies and timely topics in clinical medicine with guidance from the Editor and informed by an experienced international advisory board.

Nature and Human Society Apr 03 2020 From earliest times, human beings have noticed patterns in nature: night and day, tides and lunar cycles, the changing seasons, plant succession, and animal migration. While recognizing patterns conferred great survival advantage, we are now in danger from our own success in multiplying our numbers and altering those patterns for our own purposes. It is imperative that we engage again with the patterns of nature, but this time, with awareness of our impact as a species. How will burgeoning human populations affect the health of ecosystems? Is loss of species simply a regrettable byproduct of human expansion? Or is the planet passing into a new epoch in just a few human generations? *Nature and Human Society* presents a wide-ranging exploration of these and other fundamental questions about our relationship with the environment. This book features findings, insights, and informed speculations from key figures in the field: E.O.

Wilson, Thomas Lovejoy, Peter H. Raven, Gretchen Daily, David Suzuki, Norman Myers, Paul Erlich, Michael Bean, and many others. This volume explores the accelerated extinction of species and what we stand to lose--medicines, energy sources, crop pollination and pest control, the ability of water and soil to renew itself through biological processes, aesthetic and recreational benefits--and how these losses may be felt locally and acutely. What are the specific threats to biodiversity? The book explores human population growth, the homogenization of biota as a result in tourism and trade, and other factors, including the social influences of law, religious belief, and public education. Do we have the tools to protect biodiversity? The book looks at molecular genetics, satellite data, tools borrowed from medicine, and other scientific techniques to firm up our grasp of important processes in biology and earth science, including the "new" science of conservation biology. *Nature and Human Society* helps us renew our understanding and appreciation for natural patterns, with surprising details about microorganisms, nematodes, and other overlooked forms of life: their numbers, pervasiveness, and importance to the health of the soil, water, and air and to a host of human endeavors. This book will be of value to anyone who believes that the world's gross natural product is as important as the world's gross national product.

Libraries Driving Access to Knowledge Jun 17 2021 This book is a must for librarians with international interest in access to knowledge. It includes a collection of 15 chapters written by authors from all over the world and covers different approaches to the vital role of libraries driving

access to knowledge. There are chapters that offer solutions and ideas to enable libraries to become the knowledge engine in society. Other chapters discuss the conceptual part of the subject and related services. The book was compiled as part of the presidential theme of Ellen Tise, IFLA President 2009-2011, with the aim of offering the reader a good portrait of the opportunities and challenges that libraries have in driving access to knowledge.

Netter Collection of Medical Illustrations: Respiratory System E-Book Apr 15 2021 Respiratory System, 2nd Edition provides a concise and highly visual approach to the basic sciences and clinical pathology of this body system. This volume in The Netter Collection of Medical Illustrations (the CIBA "Green Books") has been expanded and revised by Dr. David Kaminsky to cover important topics like pulmonary hypertension, COPD, asthma, drug-resistant TB, modern endoscopic and surgical techniques, and more. Classic Netter art, updated illustrations, and modern imaging make this timeless work essential to your library. Access rare illustrations in one convenient source from the only Netter work devoted specifically to the respiratory system. Get a complete overview of the respiratory system through multidisciplinary coverage from physiology and biochemistry to adult and pediatric medicine and surgery. Gain a quick understanding of complex topics from a concise text-atlas format that provides a context bridge between primary and specialized medicine. Grasp the nuances of the pathophysiology of today's major respiratory conditions—including pulmonary hypertension, COPD, asthma, environmental lung disease, sleep disorders,

infections of the immunocompromised, neonatal breathing disorders, and drug-resistant TB, and modern endoscopic and surgical techniques—through advances in molecular biology and radiologic imaging. Benefit from the expertise of the new editor, David Kaminsky, MD, who contributes significant experience in asthma and general pulmonary and critical care medicine, and his team of world class contributors. Clearly see the connection between basic and clinical sciences with an integrated overview of normal structure and function as it relates to pathologic conditions. Apply a visual approach—with the classic Netter art, updated illustrations, and modern imaging—to normal and abnormal body function and the clinical presentation of the patient. Tap into the perspectives of an international advisory board for content that reflects the current global consensus.

Fashion, Dress and Identity in South Asian Diaspora

Narratives Aug 08 2020 This book is the first book-length study to explore the sartorial politics of identity in the literature of the South Asian diaspora in Britain. Using fashion and dress as the main focus of analysis, and linking them with a myriad of identity concerns, the book takes the reader on a journey from the eighteenth century to the new

millennium, from early travel account by South Asian writers to contemporary British-Asian fictions. Besides sartorial readings of other key authors and texts, the book provides an in-depth exploration of Kamala Markandaya's *The Nowhere Man* (1972), Hanif Kureishi's *The Buddha of Suburbia* (1990), Meera Syal's *Life Isn't All Ha Ha Hee Hee* (1999) and Monica Ali's *Brick Lane* (2003). This work examines what an analysis of dress contributes to the interpretation of the featured texts, their contexts and identity politics, but it also considers what literature has added to past and present discussions on the South Asian dressed body in Britain. Endowed with an interdisciplinary emphasis, the book is of interest to students and academics in a variety of fields, including literary criticism, socio-cultural studies and fashion theory.

World Heritage Craze in China Aug 20 2021 There is a World Heritage Craze in China. China claims to have the longest continuous civilization in the world and is seeking recognition from UNESCO. This book explores three dimensions of the UNESCO World Heritage initiative with particular relevance for China: the universal agenda, the national practices, and the local responses. With a sociological lens, this book offers comprehensive insights into World Heritage, as well as China's deep social, cultural, and political structures.

Noorse goden Jan 31 2020 In Noorse goden combineert bestsellerauteur Neil Gaiman de oude verhalen uit de mythologie van de Vikingen met de stijl van de 21e eeuw. Voor de fans van Stephen Fry's *Mythos*. In de New York Times-bestseller *Noorse goden* verwerkt Neil Gaiman,

bekend van o.a. de prijswinnende novelle *Coraline* en de cult-serie *American Gods*, de losse Noorse mythen tot een doorlopend verhaal. Noorse goden begint met het ontstaan van de legendarische negen werelden en duikt dan in de levens van goden, dwergen en reuzen. Zo moet Thor zich vermommen als vrouw – lastig, met een baard en onstillbare honger – om zijn gestolen hamer terug te krijgen. Het bloed van Kvasir – de scherpzinnigste god van allen – wordt in honingwijn veranderd en geeft de drinkers ervan magische krachten. Het boek bereikt zijn piek aan het einde met het epische verhaal van Ragnarok: de ondergang van de goden en de geboorte van een nieuwe tijd en nieuwe mensen. Perfect voor de fans van Stephen Fry's *Mythos*. 'Een pakkende, spannende en eerlijk gezegd prachtige vertelling van deze beroemde verhalen.' – *The Washington Post* 'Uitzonderlijk. Gaiman heeft een moderne interpretatie van de Vikingverhalen geschreven.' – *The Atlantic* 'Door oude Noorse mythologie te combineren met de stijl van de 21e eeuw, weet Gaiman een geheel genre nieuw leven in te blazen voor de moderne lezer.' – *Newsweek*

Time Travel in Popular Media Nov 30 2019 In recent years numerous films, television series, comic books, graphic novels and video games have featured time travel narratives, with characters jumping backward, forward and laterally through time. No rules govern time travel in these stories. Some characters move by machine, some by magic, others by unexplained means. Sometime travelers can alter the timeline, while others are prevented from causing temporal aberrations. The fluid forms of imagined time travel have fascinated audiences and prompted debate since at least the

19th century. What is behind our fascination with time travel? What does it mean to be out of one's own era? How do different media tell these stories and what does this reveal about the media's relationship to time? This collection of new essays--the first to address time travel across a range of media--answers these questions by locating time travel narratives within their cultural, historical and philosophical contexts. Texts discussed include Doctor Who, The Terminator, The Georgian House, Save the Date, Back to the Future, Inception, Source Code and others.

Bulk Collection Mar 27 2022 This is an open access title available under the terms of a CC BY-NC-ND 4.0

International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. This book is the culmination of nearly six years of research initiated by Fred Cate and Jim Dempsey to examine national practices and laws regarding systematic government access to personal information held by private-sector companies. Leading an effort sponsored by The Privacy Projects, they commissioned a series of country reports, asking national experts to uncover what they could about government demands on telecommunications providers and other private-sector companies to disclose bulk information about their customers. Their initial research found disturbing indications of systematic access in countries around the world. These data collection programs, often undertaken in the name of national security, were cloaked in secrecy and largely immune from oversight, posing serious threats to personal privacy. After the Snowden leaks

confirmed these initial findings, the project morphed into something more ambitious: an effort to explore what should be the rules for government access to private-sector data, and how companies should respond to government demands for access. This book contains twelve updated country reports plus eleven analytic chapters that present descriptive and normative frameworks for assessing national surveillance laws, survey evolving international law and human rights principles applicable to government surveillance, and describe oversight mechanisms. It also explores the concept of accountability and the role of encryption in shaping the surveillance debate. Cate and Dempsey conclude by offering recommendations for both governments and industry.

Corporate Income Tax Law and Practice in the People's Republic of China Sep 08 2020 "Provides a comprehensive analysis of China's corporate income tax law to enable foreign business people, professionals, and students to better understand China's corporate income tax system. A new corporate income tax law came into effect on January 1, 2008. The new law unified the two corporate income tax systems that were applicable to domestic enterprises and foreign enterprises and foreign invested enterprises, respectively. A large portion of this book summarizes the new tax law, the implementation rules of the law, and the interpretation circulars issued by the Chinese tax authorities"--Jacket.

Autonomy Arrangements around the World: A Collection of Well and Lesser Known Cases Apr 27 2022

Une décennie de réformes au Maroc (1999-2009) Nov 10 2020 Depuis l'intronisation du Roi Mohammed VI, le 23 juillet 1999, de profondes mutations, politiques, économiques et sociales ont été entreprises au Maroc à l'échelle nationale, tandis que de nouvelles tendances ont été enregistrées sur le plan international. Au niveau national, le présent ouvrage s'interroge sur la dynamique générée par le processus de transition démocratique. Y sont également disséqués les principaux changements opérés au niveau de la politique interne du Royaume. Sur le plan international, la

politique étrangère du Maroc a, dans le sillage de l'ouverture prônée sur le monde, pu se forger une identité géopolitique plurielle, dont le credo est la philosophie du partenariat. Dans cette perspective, sont mises en exergue les spécificités de la politique étrangère du Souverain marocain. Fruit d'un travail d'équipe initié et coordonné par le Centre d'Etudes Internationales, cet ouvrage propose une vision systémique des principales réformes entreprises durant la première décennie du règne du Roi Mohammed VI. Il contribue ainsi à une œuvre de conceptualisation, celle d'une transition vers un Réel souhaité.

The Limits of Literary Historicism Dec 12 2020 The Limits of Literary Historicism is a collection of essays arguing that historicism, which has come to dominate the professional study of literature in recent decades, has become ossified. By drawing attention to the limits of historicism—its blind spots, overreach, and reluctance to acknowledge its commitments—this provocative new book seeks a clearer understanding of what historicism can and cannot teach us about literary narrative. Editors Allen Dunn and Thomas F. Haddox have gathered contributions from leading scholars that challenge the dominance of contemporary historicism. These pieces critique historicism as it is generally practiced, propose alternative historicist models that transcend mere formula, and suggest alternatives to historicism altogether. The volume begins with the editors' extended introduction, "The Enigma of Critical Distance; or, Why Historicists Need Convictions," and then is divided into three sections: "The Limits of Historicism," "Engagements with History," and "Alternatives to History." Defying convention, The Limits of

Literary Historicism shakes up established modes to move beyond the claustrophobic analyses of contemporary historicism and to ask larger questions that envision more fulfilling and more responsible possibilities in the practice of literary scholarship.

Climate Change and the World Bank Group Sep 20 2021 This study from the Independent Evaluation Group draws lessons for development and climate change mitigation from the World Bank Group's far-reaching portfolio of projects in energy, forestry, transport, coal power, and technology transfer. Reviewing what has worked, what hasn't, and why, the evaluation's key findings include: Energy efficiency can offer countries direct economic returns that dwarf those of most other development projects, while also reducing greenhouse gas emissions. Tropical forest protected areas, on average, significantly reduce tropical deforestation, preserving carbon and biodiversity. Deforestation rates are lower in areas that allowed sustainable use by local

populations than in strictly protected areas. Deforestation rates were lowest of all in indigenous forest areas. For renewable energy projects, long-duration loans have been important in making projects financially viable.. But at prevailing carbon prices, carbon offset sales had little impact on most renewable energy projects rate of returns, and did not address investors need for up-front capital. Technology transfer broadly understood to include diffusion of technical and financial innovations related to low-carbon development has worked well when the logic of piloting and demonstration is well thought out, and when grants are used to mitigate the risk of pioneering efforts.

Historicizing the Pan-American Games Jan 25 2022 The Pan-American Games, begun officially in 1951 in Buenos Aires and held in every region of the western hemisphere, have become one of the largest multi-sport games in the world. 6,132 athletes from 41 countries competed in 48 sports in the 2015 Games in Toronto, Canada. The Games are simultaneously an avenue for the spread of the Olympic Movement across the Americas, a stage for competing ideologies of Pan-American unity, and an occasion for host city infrastructural stimulus and economic development. And yet until this volume, the Games have never been studied as a single entity from a scholarly viewpoint. Historicizing the Pan-American Games presents 12 original articles on the Games. Topics range from the origins of the Games in the period between the world wars, to their urban, hemispheric and cultural legacies, to the policy implications of specific Games for international sport. The entire collection is set

against the shifting economic, social, political, cultural, sporting and artistic contexts of the turbulent western hemisphere. Historicizing the Pan-American Games makes a significant contribution to the literature on major games, Olympic sport and sport in the western hemisphere. This book was previously published as a special issue of *The International Journal of the History of Sport*.

The Economics of Books and Reading Feb 11 2021 This book gives an overview of the key issues related to books and reading within the field of cultural economics and identifies additional lacunae in this area of research. The field of cultural economics is surprisingly short on research on the book market and on the activity of reading compared with other more recently invented media such as films and musical recordings. In addition, books and reading are strongly impacted by the disruptive innovations of digital technology and the use of online distribution platforms that fuel much of the research on the more recently invented cultural media. This book shows that the area of books and reading has had contributions in historically established areas of cultural economics and those currently exciting attention - chiefly with respect to digital disruption. Finally, it explains how books and reading are a fully developed rational addition model rather than something just based on the addition of past behaviour. Previously published in *Journal of Cultural Economics* Volume 43, issue 4, December 2019

The Liability of Internet Intermediaries Sep 28 2019 Internet intermediaries play a central role in modern commerce and

the dissemination of ideas. Although their economic and social importance is well-recognized, their legal liability remains poorly understood, and, until now, no work has specifically addressed their legal responsibility for wrongdoing carried out by third parties using their facilities or platforms. This work fills that gap by providing comprehensive coverage of the legal duties owed by intermediaries and the increasingly complex schemes that regulate their activities. The first part of the work introduces the concept of an internet intermediary, general doctrines of primary and secondary liability, and the European enforcement regime. The second part examines the liability of intermediaries in specific areas of law, with a detailed analysis of the applicable liability rules, and the major English case law, and decisions of the Court of Justice that interpret and apply them. The final part of the work provides guidance on remedies and limitations. Written by an expert author from the intellectual property chambers at 8 New Square, Lincoln's Inn, this is an essential guide for lawyers advising on IP matters and disputes involving internet content.
